Education

Sharif University of Technology, Tehran, Iran — Sept 2022 – Sept 2026
B.Sc. in Computer Engineering
GPA: 19.70/20 | **Class Rank:** 6/201

Selected Coursework: Advanced Information Retrieval (20), Machine Learning (19.9), Artificial Intelligence (19.9), System 2 (Reasoning) AI* (20), Reinforcement Learning* (20), Probability & Statistics (20), Linear Algebra (20).
*Master's-level coursework.

Publications

SELECT: Setwise Efficient Log-probability Estimation for Competitive Tournament Ranking
Amirhossein Ghadami, Amin Bigdeli, Radin Hamidi Rad, **Radin Cheraghi**, Negar Arabzadeh, Charles LA Clarke, Ebrahim Bagheri.
Under review at WWW 2027.

Peerify: Benchmarking Peer-Review Claim Verification
Alireza Daghighfarsoodeh, Sajad Ebrahimi, Ali Ghorbanpour, Soroush Sadeghian, **Radin Cheraghi**, Negar Arabzadeh, Ebrahim Bagheri.
EMNLP 2026 (Industry Track). Paper

PeerPrism: Peer Evaluation Expertise vs Review-writing AI
Soroush Sadeghian, Alireza Daghighfarsoodeh, **Radin Cheraghi**, Sajad Ebrahimi, Negar Arabzadeh, Ebrahim Bagheri.
SIGIR 2026 (Resource Track). Paper

A Multidimensional Study of LLM Deception: Capability, Value Priorities, and Contextual Triggers
Radin Cheraghi, Arash Marioriyad, Mahdieh Soleymani Baghshah.
Unpublished manuscript, 2026.

Epistemic Uncertainty-aware Recommendation Systems via Bayesian Deep Ensemble Learning
Radin Cheraghi, Amir Mohammad Mahfoozi, Sepehr Zolfaghari, Mohammadshayan Shabani, Maryam Ramezani, Hamid R. Rabiee.
arXiv preprint, 2025. Earlier preprint
A substantially revised and extended version is under review at WWW 2027.

Research Interests

Information Retrieval and Retrieval-Augmented Generation; Natural Language Processing and Large Language Models; Reasoning and Planning in Language Models; LLM Reliability and Safety.

Research Experience

Research Assistant (Remote) — Dec 2025 – Present
LS3 Lab, University of Toronto & Reviewerly
Advisors: Prof. Ebrahim Bagheri (University of Toronto) and Dr. Negar Arabzadeh (UC Berkeley)

- Built peer-review datasets and benchmarked AI-text detectors, analyzing whether predictions reflect the origin of ideas or wording.
- Evaluated lexical and dense retrieval with cross-encoder reranking for retrieval-augmented verification of peer-review claims.
- Investigating question decomposition and evidence retrieval for deep research agents.

Research Assistant — Oct 2025 – Present
Machine Learning Lab (MLL), Sharif University of Technology
Advisor: Prof. Mahdieh Soleymani Baghshah

- Evaluated deception across multiple LLMs using benchmarks and interactive games, examining reasoning and planning

capabilities, value priorities, and contextual triggers.

Summer Research Intern June 2025 – Sept 2025
STAR Lab, The University of Hong Kong
Advisor: Prof. Reynold Cheng

- Investigated query decomposition and knowledge graphs for multi-hop question answering, alongside bandit-based optimization of evidence retrieval.

Research Assistant Sept 2024 – Apr 2025
Data Science & Machine Learning Lab (DML), Sharif University of Technology
Advisors: Prof. Hamid R. Rabiee and Prof. Maryam Ramezani

- Investigated Bayesian collaborative filtering using uncertainty-aware user–item representations, learned matching, and ensemble predictions.

Teaching Experience

Teaching Assistant, Sharif University of Technology

- System 2 (Reasoning) AI; Artificial Intelligence; Intelligent Analysis of Biomedical Images.
- Linear Algebra; Engineering Probability and Statistics.
- Data Structures and Algorithms; Computer Structure and Machine Language; Fundamentals of Programming (Python).

Selected Projects

Multimodal Product Search Code
- Developed and evaluated a text–image search system combining dense and sparse retrieval, rank fusion, and cross-encoder reranking.

System 2 Reasoning in AI Code
- Implemented neuro-symbolic reasoning, inference-time search, LLM post-training with GRPO, and graph-based retrieval-augmented generation.

Deep Reinforcement Learning Code
- Implemented value-based and policy-gradient methods, extending to offline, multi-agent, and meta-reinforcement learning for control and adaptation tasks.

Honors & Awards

- **HKU CDS Summer Research Internship Programme** — Selected as one of 50 undergraduate participants worldwide, 2025.
- **Cornell–Maryland–Max Planck Pre-Doctoral Research School (CMMRS)** — Selected as one of 80 undergraduate and master's participants, 2025.
- **Iranian National University Entrance Examination (Mathematics)** — Ranked 45th among 145,615 candidates (top 0.03%), 2022.

Technical Skills

Programming: Python, C/C++, Java, R
Machine Learning: PyTorch, TensorFlow, scikit-learn, NumPy
LLM Frameworks & Tools: Hugging Face Transformers, vLLM, DeepSpeed, LangChain, OpenAI API
Parallel Computing: CUDA, OpenMP

Languages

Persian: Native **English:** Professional working proficiency
